

Contract Managers vs. Software Coordinators

Contract Managers and Software Coordinators have special roles that allow them to manage and maintain Autodesk software licenses. See these resources for information about managing these roles on a subscription contract:

- [Changing your Contract Manager](#)
- [Changing your Software Coordinator](#)

Contract Manager

The main point of contact on an Autodesk subscription contract. If you subscribed to Autodesk or were assigned by your company as the contract administrator on a maintenance plan, you are the Contract Manager. Here are some of the permissions and tools unique to the role:

- **Email Communication:** Receives the welcome email with details about setting up new software and users as well as contract renewal notices and other related communication.
- **User Management:** Can identify Software Coordinators and other Users who need access to software and services in Autodesk Account.
- **Contract Management:** Can access contract renewal and billing information in Autodesk Account.

Software Coordinator

A role assigned by the Contract Manager to assist in the management of a subscription contract. Here are some of the benefits of this user role:

- **Email Communication:** Receives notifications about downloading new releases, extensions, or upgrades of Autodesk software.
- **User Management:** Assign access to software and services in Autodesk Account.
